

**REMARKS**

Claim 1 has been amended to improve its form and to more clearly define the invention over the prior art. Support for the amendments to Claim 1 is found in FIG. 1F and at the first full paragraph of page 12, where a connection between an anode 102 of one device and a cathode 104 of a neighboring device is illustrated.

An early and favorable action on the merits is solicited.

February 2, 2007

Respectfully submitted,

By 

James P. Zeller, Reg. No. 28,491
